SUMMARY

A skilled React and Next.js developer with nearly two years of experience in building scalable web applications using TypeScript and various databases. Proficient in front-end and back-end development, I am also expanding my expertise into mobile development with React Native. Known for my problem-solving abilities and dedication to delivering high-quality, user-centric solutions, I am continuously learning and applying new technologies to enhance my skill set and create impactful digital experiences.

PROFESSIONAL EXPERIENCE

Aclymate

Jan 2023 - Present

- Enhanced Aclymate's SaaS platform by developing APIs and integrating third-party systems, improving carbon footprint calculations.
- Revamped Renoster's marketing website, boosting user engagement and communication of the company's mission.
- Led backend development at Aclymate, ensuring seamless API connections for better client access to carbon solutions.
- Contributed to Renoster's app development, facilitating interactions between buyers and landowners in carbon credit transactions.
- Ensured platform reliability at both companies by troubleshooting issues, providing support, and optimizing performance.

PROJECTS

Twitter Clone (github.com/farukkandemir/twitter-clone)

- Developed a modern web app using Next.js 13, Prisma and MongoDB, showcasing front-end and back-end expertise.
- Implemented a secure user authentication with NextAuth.js, efficient form handling with React Hook Form.
